Programming Languages	Java,C
Web Development	HTML, CSS, JavaScript, React.js, SQL, MySQL
Cloud Technologies	AWS,Google Cloud
Tools and Frameworks	Git, Maven, REST APIs
CS Fundamentals	Object-Oriented Design, Data Structures, Algorithms

PROJECTS

Online Book Store (OpenPages).

- Led the development of an online book store, "OpenPages," allowing users to explore and purchase or rent books.
- Key features included user authentication, book management, and transaction processing.
- Used JSP for the front-end and MySQL for the database, with development done in CodeReady Studio.
- Designed and implemented administrative operations for smooth inventory management.

Indian Culture Information Management System

- Developed a web application to manage and explore cultural sites.
- The Admin Module enabled managing site details, multimedia uploads, and event scheduling.
- The User Module allowed users to explore sites, view multimedia content, and leave reviews..
- Used JSF for the front-end, JPA for database interaction, and MySQL as the database.

SevaNet Project

- Developed a community service application called "SevaNet" using Spring Boot, JSP, and MySQL.
- Implemented features for managing community events, volunteer registration, and resource allocation.
- The User Module allowed users to explore sites, view multimedia content, and leave reviews..
- Designed the database schema for efficient data handling and ensured seamless user interactions.
